EXECUTIVE SUMMARY

Full Stack Developer and Solutions Engineer with 2+ years of experience delivering scalable web applications and enterprise integrations. Specialized in Node.js, React.js, TypeScript, and AWS Lambda, with a track record of designing event-driven architectures, REST APIs, and OAuth 2.0 systems that ship on time and hold up in production. Experienced in Agile development practices, collaborating across teams to deliver iterative, production-ready solutions. Recently focused on MCP-based LLM integrations and intelligent workflow automation, bridging modern AI tooling with real business systems.

WORK EXPERIENCE

Solutions Engineer

May 2025 – Present

Moxo Solutions Pvt. Ltd.

- Designed and Developed event-driven automation workflows using Node.js for data synchronization and approval processes, reducing manual effort across business operations.
- Built scalable REST API connectors for integrating enterprise platforms.
- Improved integration reliability by implementing robust error handling and secure authentication mechanisms, significantly reducing API failures.
- Built and managed multi-platform integrations with tools such as Slack, Microsoft Dynamics, and HubSpot, enabling scalable workflow orchestration.
- Implemented OAuth 2.0-based authentication and authorization, improving API security and reducing authentication failures.
- Developed and integrated MCP (Model Context Protocol) servers (Zapier MCP, Jira MCP) to support dynamic tool execution in prompt-driven workflows.
- Integrated LLM-based solutions with MCP architecture to enable natural language-driven workflow automation, real-time data retrieval, and intelligent task execution.
- Worked in an Agile environment with regular code reviews and iterative development cycles.

Full Stack Developer (MERN Stack)

Jun 2024 – May 2025

Business Core Solutions

- Developed React.js-based modules including Admin Reporting and Password Vault with improved UI performance.
- Built scalable backend services using Node.js and Express.js to support business operations.
- Integrated frontend with backend APIs to enable seamless data flow and dynamic UI updates.
- Participated in code reviews to ensure code quality, maintainability, and adherence to engineering best practices.

PROJECTS

Moxo | Workflow Orchestration & Automation Platform

Tech Stack: Node.js, AWS Lambda

May 2025 – Present

- Architected a modular event-driven system capable of handling concurrent workflow triggers across 3+ enterprise platforms without manual intervention.
- Designed MCP-based tool execution engine enabling LLMs to dynamically invoke external APIs based on natural language prompts.

Anugal | Identity Governance & Administration Platform

Tech Stack: React.js, Material UI, Node.js

Jun 2024 – May 2025

- Independently built Password Vault module UI using React.js, handling secure data display, user access control, and backend API integration for credential management.
- Designed Admin Reporting dashboard with dynamic data filtering and real-time audit log visualization.
- Built 10+ reusable React components with Material UI, reducing UI development time across modules.

Portfolio Web Application

Tech Stack: React.js, Material UI

aakash-045.github.io/my-portfolio

- Developed and deployed a responsive personal portfolio application using React.js and reusable component architecture.
- Hosted application using GitHub pages.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript.

Backend Technologies: Node.js, Express.js.

Frontend Technologies: React.js, Material UI, HTML5, CSS3.

Cloud & Infrastructure: AWS Lambda, Webhooks, Event-driven Architecture.

Databases: MySQL.

APIs & Integrations: REST APIs, OAuth 2.0, MCP Servers (Zapier MCP, Jira MCP).

Tools & Platforms: GitHub, Postman, VS Code, Jira, Agile/Scrum.

AI & Automation: LLM Integration, MCP Architecture, Prompt-Driven Workflow Automation.

EDUCATION

B.Tech – Information Technology

Jul 2019 – Apr 2023

Adhiparasakthi College of Engineering | CGPA: 7.98

ACHIEVEMENTS

- Obtained MySQL Certification, demonstrating proficiency in relational database management and SQL optimization.
- Claude Code Certification – Hands-on training in AI-assisted development, project planning, prompt engineering, and code execution using Claude Code. Certification URL: <https://verify.skilljar.com/c/wmc8aw7ix8r>.
